

Seraphin® Handheld Test Measures

Series E3 Field Test Measure

- Three inch OD neck provides the 5 Gallon measure with a ½ cubic inch resolution.
- Three inch OD neck provides the 20 Liter measure with a 10 milliliter resolution.
- The Seraphin® field test measure has a S/S bottom grip to help facilitate pouring.
- A one-piece scale plate, with graduations on both sides, makes reading the meniscus easier.
- Each measure has a removable non-slip rubber hand grip on the handle. The grip easily slides on and off the bail handle for leveling.
- The Seraphin® Series E3 test measure is manufactured of type 300 stainless steel, which resists ordinary rusting, can be easily cleaned, resists organic chemicals, no slag and requires no internal coating.
- The Seraphin® test measure is easy to use, reliable, low cost way to measure the output accuracy of liquid metering equipment and is ideally suited for fuel dispensing applications.
- They are built and calibrated to the latest API, OIML R-120 and NIST handbook 105-3 standards.

Seraphin® typically stocks 5 and 1-Gallon, 20, 10 and 5-Liter test measures. The scale resolutions of 0.25 cubic inches / 10 or 5 millimeters. Other capacity test measures including Imperial Gallons are available and are custom fabricated. Call for details.

Seraphin® Series “EM” Test Measure

The Seraphin EESS0005GM and EESS0020LM are custom made test measures having a “high sensitivity” neck. This provides scale resolutions of 0.25 cubic inches / 5 millimeters respectively. Typically this measure is NOT used in field work but in the laboratory, waterdraw applications or where special conditions dictate a more defined resolution.
